

### **Senior .Net Software Engineer**

If you are a Senior Software Engineer with experience developing applications in C# and .NET we are looking for you!

#### **Your job**

- You will be part of an agile team.
- You will analyze customer requirements, perform feasibility studies, provide technical proposal, estimate workload and contribute to project requirements specification.
- You will participate in the design, implementation, security and validation of applications within a project team structure.
- You will collaborate in the documentation related to these activities.
- You will design, implement, deploy and manage scalable and high-availability backend services.
- You will contribute to the full development cycle from design, planning, implementation, deployment and live operations.
- You will troubleshoot and optimise live systems.
- You will explore and learn new technologies, and contributing to best practices already in place.

#### **Must-haves**

- Degree in Computer Engineering or similar.
- Fluent in English (Minimum B2/C1).
- Fluent in Dutch is highly valued but not required.
- +5 years working with Microsoft stack (C#, Web Services, Azure...).
- Solid experience with .NET MVC and web development.
- Experience with Web Services and REST APIs.
- Experience with Microsoft SQL server.
- Comfortable working in a team environment with distributed version control (Git).
- Experience with modern software engineering best practices: Agile/Scrum, unit testing/test automation, CI, design patterns, TDD, etc.
- IIS / Azure.
- AngularJS.

-HTML5, JavaScript.

-Microsoft Visual Studio.

-Visual Objects.

### **Nice-to-haves**

-Microsoft certification MCTS is a plus.

-Possession of an MCSD certification or having passed exams 70-480, 70-483, 70-486 and / or 70-487 is a plus.

-Knowledge of scalability of web applications/services is a plus.

-Knowledge of database scaling and optimization techniques is a plus.

### **The person that will fit our team should be**

-Team focused, highly collaborative, with a positive attitude.

-Proactive, efficient and flexible.

-Communicative.

-Customer and results oriented.

-Committed to her/his work, responsible for meeting deadlines and in continuous training of latest technologies.

-With great ability to work in a team.
